## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claim 1-6, drawn to packet header designating cryptographically protected data, classified in class 713, subclass 160.
  - II. Claim 7-9, drawn to key distribution, classified in class 380, subclass 278.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions
  - a. Invention I discloses a method of modifying an header upon addition of cryptographic information.
  - b. Invention II discloses a method of distributing keys to plurality of entities.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
